Nineteen-year-old Adam has no memory and is trapped in a nightmarish dystopia without hope: the city of San Francisco exists underwater after a cataclysmic earthquake and tsunami kills most of the world's population. If Adam can escape, he can escape to safety in the underground city where he will raise his son with the woman whose love has gotten him this far. If he can't, his chances are even slimmer.

This is a young-adult novel about two sisters in crisis in the aftermath of 9/11. It's an action-packed thriller. I read it when I was in high school and I remember being very moved by it. It is set mainly in Washington D.C. during the days and weeks after the attack. I love stories about survival and this book is full of them.

This is a fantastic story about a boy named Caleb Serrano who lives with his family in Florida after losing his leg in an accident. His life changes when he befriends a marooned girl on an island near his house. I don't want to say too much about this book because it is one of those books that you have to read with as little information as possible, but it's definitely worth checking out if you're into adventure stories or mysterious tales.

This book is technically classified as young adult literature, but it's still pretty good for anyone. It's a story about a boy named Trev whose best friend is William, and the two of them travel to France to find their long-lost father. It's one of those books that I don't want to say anything about as well because I think that it should be experienced without any spoilers. It's also kind of long, but it's worth it in my opinion.

The Art of Racing in the Rain: A Novel is a good book for both adults and young adults alike. The book follows an elderly racecar driver named Enzo Ferrari and his relationship with his wife Dora, the hospital matron who helped him through his physical and emotional struggles. Enzo narrates the novel with his omnipresent voice in his own view on the world. The book is written in a very detailed manner and I didn't really understand it until I read it again about ten years later, after gaining an appreciation for more adult-oriented fiction. It's definitely worth your time.

This is a classic adventure novel that follows two characters that are forced to survive in the wilderness after being stranded on an island. It's full of life lessons and themes that are still relevant today.

This book is about a girl named Julie who moves to New York City after her mother falls ill with cancer, leaving Julie without enough money to pay her dormitory fees at college.
